Which tool does what? Take a look at these amazing transformations of ugly concrete into works of art by Engrave-A-Crete customers to find out.

Create an Ashlar Slate design using the Cobra or Mongoose.

The Cobra is ideal for both linear and cicular brick. Also possible with the Mongoose.

Engrave custom logos with ease using Sandroid or the KaleidoCrete System.

This Corporate logo was engraved with the KaleidoCrete tools. Can also be created with Sandroid.

Use the Cobra or Mongoose for straignt lines, then add a border with Sandroid or Kaleidocrete.

To get this look, use the Cobra or Mongoose to engrave straight lines and circular brick and the KaleidoCrete tools for the medallion.

Engrave flagstone quickly and easily with KaleidoCrete tools.

Create large or small template based designs using KaleidoCrete or Sandroid.

Engrave a stunning combination of diamond tile and circular brick using the Cobra or Mongoose. Include a custom logo using Sandroid or KaleidoCrete tools.

An attractive wood plank look can be achieved using the Cobra or the Mongoose.

Engrave awesome Ashlar Slate patterns with the Cobra or Mongoose.

Another great flagstone pattern created with KaleidoCrete tools.

The compass rose pattern is impressive yet simple using the Mongoose or Cobra.

With Sandroid or KaleidoCrete and a custom template, designs are limitless.

Circular brick is the Cobra's specialty. This project could also be engraved using the Mongoose. The "H" was made with KaleidoCrete tools.

See the Tool Comparison Chart on page 35 for more information.

Decorative Concrete Training, Processes, Tools & Equipment

We are the manufacturer with real people working for you!

For over 20 years Engrave-A-Crete has been revolutionizing the way the world views concrete and flooring. You can easily reach us by phone, and we're sure you'll be pleased to hear a real, on-site person answer during business hours to take your order or connect you with our technical support team. Visit our website and online store if you would like to learn more about decorative concrete staining and engraving, have a product question, or want to place an online order.

We offer hands-on decorative concrete training at our world-class facility. Check our website for a date that works for you, or order the Mastering Concrete Engraving DVD to get a jump start on your career in decorative concrete. Our processes, precision-crafted tools and equipment are changing the world, one surface at a time.

If you want to learn more about decorative concrete but can't come to a seminar, check out our library of videos on many topics including basic concrete staining, engraving techniques, stencil application, tool demonstrations and more. Visit www.Engrave-A-Crete.com/gallery

9 Reasons Why Concrete Engraving Is Your Customers' Best Choice

1. The pattern is cut into your customer's ordinary, existing, hard concrete. And the best part is, customers understand it is better for the design to be "IN" not "ON" the concrete.

2. By remodeling your customers' existing concrete with easy to install concrete engraving, you will save them time, mess and money.

3. The pattern will last the life of the concrete. Many engraved concrete patterns look even better as they age.

4. Engrave-A-Crete is not a topping or overlay that can delaminate.

5. The concrete engraving process disguises cracks, repairs and imperfections as it beautifies the surface.

6. Concrete engraving is fast, clean and surroundings are undisturbed. There is NO intrusive demolition nor is the concrete replaced. Your customers want you in and out ASAP.

7. A wide variety of designs, patterns and logos are available along with a huge color selection.

8. No mandatory maintenance is needed.
   - Ordinary dirt and grime wash away with a garden hose.
   - Resists tire marks.
   - Oil drippings wipe right off the surface.
   - Weeds cannot grow between these "grout" lines.
   - Engraved brick, tile, stone or paver patterns can never come loose.
   - Enhanced resistance to salt and moisture penetration.

9. Engrave-A-Crete process is a property investment that adds distinctive value, beauty and curb appeal to any home or business.

Mongoose

Blade Port
For the operator who prefers to see the blade during cutting

Removable Handle
Ergonomically designed with the operator in mind. Press down to cut and the handle properly positions to eliminate muscle strain. Removes with only 2 set screws for quick transition to a low profile engraver for confined spaces.

Lateral Pointing System
Front, rear and side pointers show operator exactly where a cut begins and ends for absolute accuracy.

Conical Bearing Pivots
Set to ball bearing pivots to eliminate head shake for smoothest action.

Depth Control Screw
Adjusts on the fly. 20 threads per inch give precise adjustment for accurate depth control. Cuts to a maximum of 1/4" deep.

Side Rail Mounting Holes
Drilled and ready for future accessories.

One Year Full Warranty
Made in the USA

On/Off Switches
Use the switch conveniently located on the handle, or the switch on the motor when the handle is not attached.

79mm Dia. Self-Sharpening Premium Diamond Blade
Optimum diameter blade for precise intersecting cuts.

Specifically tuned to match the motor, the 79mm blade gives more torque while cutting and less kerf ramp when ending cuts. Also made in the USA.

Vacuum Port positioned for optimum dust uptake
Catches dust at the source for dust-free cutting. Reduces adverse profiling of the blade. Side mount keeps vacuum out of the way during cutting.

Flip-Up Pointers
Simply align the pointers on a chalk line for fast and easy cutting. Flip the pointers up and out of the way to get close to wall and for reverse cutting.

Optional Blade Widths
Choose blades from 0.090 to 0.375". See page 8 for details.

Spring-Loaded Cutting Head – Press down to cut. Let up and the blade raises out of the cut for total operator control.

Powerful Motor – Finest quality German-made 8 amp motor spins the blade at a whopping 10,000 RPM for easy cutting and fewer stalls. Powered by 110v, 220/240 is available for international use.

Precision Machined – Made in the USA from solid blocks of 6061-T6 billet aluminum. So perfectly machined that it requires no polishing.

Lightweight – Easily moves from one position to another in the design. Lessens operator fatigue. Easy to transport and store.

Wide High Traction Wheels – Top-of the line, Hy-Grade urethane wheels increase stability.

See the Tool Comparison Chart on page 35 for more information.

Mongoose X Cutting Unit

Great for straight lines, perfect circles and free form curves, the versatile X quickly and efficiently transforms existing concrete into works of art. Xactly what the decorative concrete industry has been waiting for.

Model #: MGX-70 $2,495

Mongoose X Handle

Add a handle to your Mongoose X for stand up operations.

Model #: MGX-70 $399.95

One Year Full Warranty

The Mongoose X Pro Pack

Includes:

- Mongoose X Concrete Engraver
- Removable Handle
- 3.1 x .125 USA Diamond Blade
- .090 Premium USA Diamond Blade
- .250 Premium USA Diamond Blade
- .375 Premium USA Diamond Blade
- Center Pivot and 6 Connecting Tubes
- Trammel Point Layout Kit
- Extension Handle On/Off Switch
- Custom Storage Case
- Wide, High-Traction Wheels
- Training Manual w/ Design Ideas

Model #: MGX-75 $3,995

Attention Professional Installers:

Take it for a test drive... The Mongoose X has a money back guarantee. Try it for 90 days. If the X isn't worth every penny you paid for it, return it and we'll refund your money. You only pay for return freight.

The Mongoose AIR Pro Pack

Includes:

- Mongoose AIR™ Concrete Engraver
- Center Pivot
- 6 Connecting Tubes
- Air Tool Oil
- 50' Air Hose
- 3.1" x .090" Premium USA Blade
- 3.1" x .125" Premium USA Blade
- 3.1" x .250" Premium USA Blade
- 3.1" x .375" Premium USA Blade
- Custom Storage Case
- Wide, High-Traction Wheels
- Training Manual w/ Design Ideas
- Trammel Point / Edge Parallel Marker Kit
- 90PSI/30 to 50CFM

Model #: MG-605 $3,495

One Year Full Warranty

Mongoose AIR Cutting Unit

This air powered international superstar is the next generation of the Mongoose family. Comes complete with wide, high-traction wheels, blade changing tools, and operator manual. Also includes premium, made in USA, 1/8" wide diamond blade (Model #BL-31125). Low power air driven for use where electric power is not available or is prohibited.

Model #: MG-600 $1,995

The Mongoose™ Accessories

Mongoose X and AIR Concrete Engraving Blades

Item	Model #	Price	
3.1″ x .090″	BL-31090	$129.95	Made in USA
		Approximate Cut Width	
3.1″ x .125″	BL-31125	$139.95	Made in USA
		Approximate Cut Width	
3.1″ x .250″	BL-31250	$199.95	Made in USA
		Approximate Cut Width	
3.1″ x .375″	BL-31375	$259.95	Made in USA
		Approximate Cut Width	

Center Pivot Kit

Engrave perfect circles using the center pivot and connecting tubes. The unique base is machined out of rigid, non-marring plastic with cross hair sighting slots and mounting holes. For use with Mongoose 411, Mongoose AIR and Mongoose X.

Model #: MG-505 $199.95

Water Kit for Mongoose AIR

Featuring quick release connectors for quick and easy connection to the Mongoose Air, this dust control and water mist cooling system keeps your diamonds cool and open for the quickest cutting speed possible. When combined with the use of a wet vacuum (connected to the Mongoose AIR), there is no dust produced and very little slurry left behind.

Model #: MG-615 $99.95

Trammel Point / Edge Parallel Marker Kit

A dual purpose tool for circular and angular layout as well as drawing border lines which follow the edge profile of a slab. As a trammel point kit, it acts just like a drawing compass for paper (just a much larger scale). You will use this tool to find perfect angles, straight lines, and trace perfect circles. You can add additional connecting tubes to extend the radius of this tool.

Model #: ME-406 $99.95

20″ Connecting Tube

Each connecting tube is 20″ long and screws together to form extensions for any size circle you need to cut.
2 Connecting Tubes = 7′ dia. circle
6 Connecting Tubes = 20′ dia. circle
10 Connecting Tubes = 33′ dia. circle
For use with Mongoose X, Mongoose 411 & Mongoose AIR.

Model #: MG-502 $39.95 per tube

Non-Marking Wheel Kit

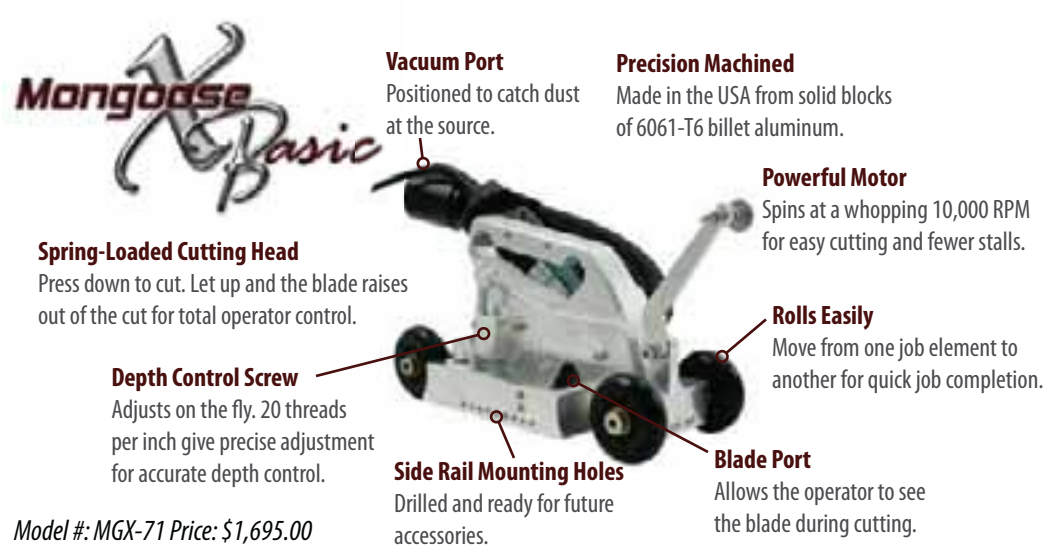
Specifically designed for cutting overlayments, micro-toppings and other surfaces which tend to mark easily. Sealed bearings. Set of 4. Compatible with Mongoose X, Mongoose 411, Mongoose AIRand Cobra.

Model #: MG-513 $195.95

Narrow Wheel Kit

Used for track free engraving of free form curves and shapes or for cutting small radius circles and arcs when attached to a center pivot. Kit includes (4) wheels, (4) axles and hex wrench. Compatible with Mongoose X, Mongoose 411, Mongoose AIR and Cobra.

Model #: ME-349 $99.95



Model #: MGX-71 Price: $1,695.00

Power through concrete with a Mongoose

Mongoose 411 Concrete Engraving Blades

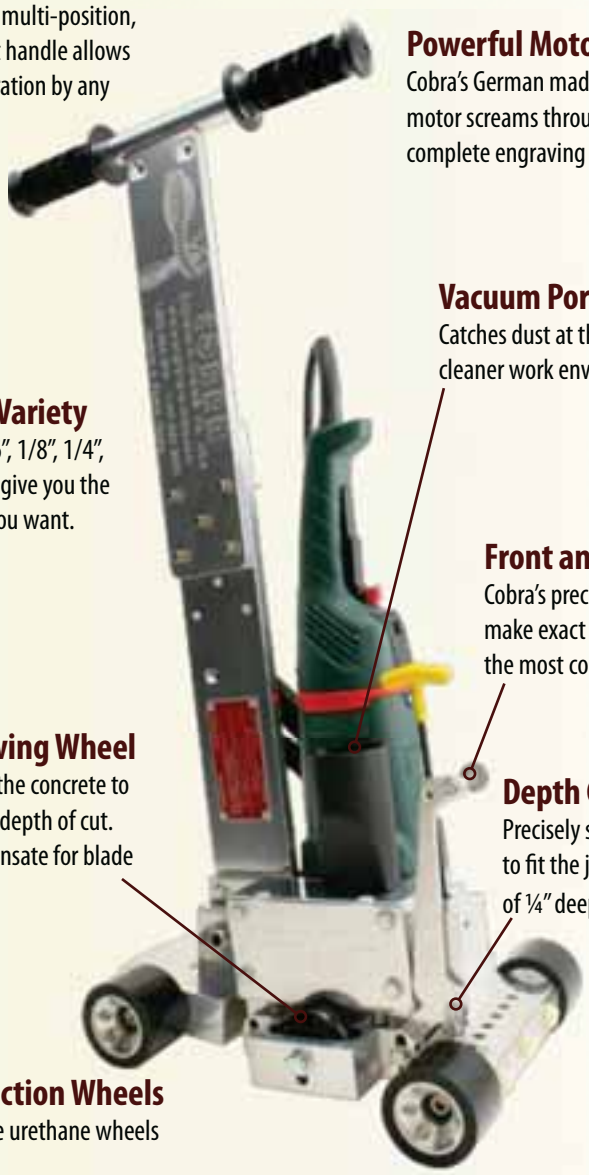
The Cobra - Decorative Concrete Engraving's Dream Machine

Fast. Powerful. Versatile. Precise. All the features you're looking for in a heavy-duty engraver in one tool. With the easy to use yet super-strong Cobra, the world of designs on concrete is literally at your feet. Whether you choose geometric layouts, linear or circular brick, slate, tile or any of thousands of other patterns, Cobra puts you ahead of the decorative concrete competition and on the cutting edge of profits.

Adjustable Handle
Cobra's two piece multi-position, adjustable height handle allows for stand-up operation by any operator.

Powerful Motor
Cobra's German made 15 Amp, 8500 RPM motor screams through concrete so you complete engraving jobs in nothing flat.



Vacuum Port
Catches dust at the source for a cleaner work environment.

Blade Width Variety
Cobra accepts 1/16", 1/8", 1/4", and 3/8" blades to give you the design flexibility you want.

Front and Rear Pointers
Cobra's precision pointers help you make exact cuts every time, even in the most complicated designs.

Contour Following Wheel
Rides the surface of the concrete to maintain a constant depth of cut. Adjustable to compensate for blade wear.

Depth Control Screw
Precisely set the engraving depth to fit the job – up to a maximum of ¼" deep.

Wide, High Traction Wheels
Top quality Hy-Grade urethane wheels increase stability.

Solid Aluminum Chassis
Cobra is proudly machined from solid blocks of 6061 T-6 billet aluminum at our manufacturing facility right here in the USA.

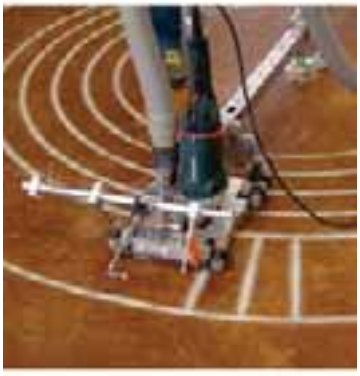
Cobra Accessories For Precision Control

The Cobra™ Tracking system



Linear Carriage

Carriage glides on linear rails for smooth cuts. Used for linear designs such as straight brick, offset tile, block and cobblestone.

Model #: SC-111 $499.95

Connecting Bar Support Wheel

Helps prevent connecting bar sag. Recommended when extending the connecting bar beyond 16 feet .

Model #: SC-110 $69.95

Primary Connecting Bar Assembly

Attaches the Super Compact to the tracking systems. Includes Clamp Block, Stabilizer Assembly, Star Knob, 9/64" T-Handle, 4" and 8" Spacer

Model #: SC-155 $495.00

4" Spacer for Primary Connecting Bar
Model #: SC-146- $4.95

8" Spacer for Primary Connecting Bar
Model #: SC-145- $4.95

Standard Aluminum Connecting Bar

28" long with indexing holes drilled on 4" centers, includes splice insert and screws.

Model #: SC-108

$99.95 (each)

4 Foot Linear Tracking Bar

When cutting large areas of linear brick or cobblestone, connect multiple sections together with dowel pins to achieve desired length.

Model #: SC-181 $199.95

4 Foot Linear Full Base

Cuts small areas of linear brick or cobblestone without the need to anchor to the concrete.

Model #: SC-116 $389.95

Connecting Bar Screws

Special under cut heads 1/4-20 UC. Used to attach connecting bars together. These screws are **NOT** standard screws. Use of any other type of screw will result in a loose fit between the bars. Bag of 50.

Model #: SC-109 $9.95

Center Pivot

Use two or more center pivots to weave circular brick patterns together. Machined from solid aluminum. Complete with indexing pin, star knob, and smooth rotating ball bearing.

Model #: SC-103 $199.95

"Stand On" Base

Cut circles without anchoring the center pivot to the concrete. Machined out of rigid, non-marring plastic with crosshair sighting slots. Simply stand on the base to weigh down the center pivot. ***Center Pivot sold separately.***

Model #: SC-175 $149.95

DIAMOND BLADES
DESIGNED FOR THE COBRA
Your key to speed and precision

Cobra Concrete Engraving Blades

Item	Model #	Price	
4.5" x .090"	BL-45090P	$149.95	Made in USA
		Approximate Cut Width	
4.5" x .125"	BL-45125P	$159.95	Made in USA
		Approximate Cut Width	
4.5" x .250"	BL-45250P	$219.95	Made in USA
		Approximate Cut Width	
4.5" x .375"	BL-45375P	$289.95	Made in USA

Note: To prevent a thin core blade from spinning between the hub nuts, reverse the outside nut so the raised flanges do not bottom out.

See the Cobra in action at Engrave-A-Crete.com /cobra

The right wheel for every job!

Non-Marking Wheel Kit

Specifically designed for cutting overlayments, micro-toppings and other surfaces which tend to mark easily. Sealed bearings. Set of 4. Compatible with Mongoose X, Mongoose 411, Mongoose Air, SawKart and Cobra.

Model #: MG-513 $195.95

Wide Wheel Kit

Sealed bearings. Really cool all aluminum rims. Provides better traction and stability on concrete especially for straight-line cuts. Set of 4. Compatible with Mongoose X, Mongoose 411, Mongoose Air, SawKart and Cobra.

Model #: MG-512 $175.95

Dynamic-Directional Wheels

Dynamic wheels allow the machine to move freely in any direction. Used with linear tracking system and when attached to a center pivot. Kit includes (8) wheels, (4) axles and hex wrench. For use with the Cobra.

Model #: SC-182 $199.95

Narrow Wheel Kit

Used for track free engraving of free form curves and shapes or for cutting small radius circles and arcs when attached to a center pivot. Kit includes (4) wheels, (4) axles and hex wrench. Compatible with Mongoose X, Mongoose 411, Mongoose Air, SawKart and Cobra.

Model #: ME-349 $99.95

Choose the KaleidoCrete™ System
For Impressions That Last A Lifetime

The KaleidoCrete System...

- 3 tools used with design templates to engrave concrete anywhere.
- Tools have high-speed reciprocal impacting teeth that knock off tiny bits of concrete to leave a detailed image. Staining concrete prior to engraving the design adds "wow" factor.

The Tools...

- Shark—great for the largest engraving jobs.
- Barracuda—mid-size for hard-to-reach places and intricate designs.
- Wasp—perfect for touch-ups and adding fine details.

The Applications...

- Vertical—one of the **most overlooked** concrete surfaces. KaleidoCrete is perfect for engraving garden walls, steps, basement walls, adding house numbers... The possibilities are endless!
- Horizontal—floors, patios, pool surrounds...in fact any horizontal surface regardless of the condition of the concrete.
- Large or small designs—a variety of templates allows you to engrave vines wrapped around a corner, logos onto a glass wall, emblems onto a floor... you're limited only by your imagination.

The Designs...

- Online template catalog of hundreds of images.
- Reusable, custom design templates from your photo, line drawing or idea.
- Any size template you need to fit your job.

The Benefits...

- Easy to learn, easy to use
- Multiple surface capabilities make KaleidoCrete an economical choice for you and your customer.
- Template selection, including custom designs you create, give you an edge over the competition.

The KaleidoCrete Pro Pack

Includes:

- Shark Concrete Engraver
- Barracuda Concrete Engraver
- Wasp Concrete Engraver
- 50' Air Hose with Couplers
- Air Nozzle Duster
- Replacement Impactors (130/pk)
- Replacement Stinger For Wasp
- Air Tool Oil
- *Mastering Decorative Concrete Engraving* DVD

Model #: KC-300 $1,795

Barracuda™ Concrete Engraver

Mid-sized Mochton Stylus Barracuda Concrete Engraver has 29 replaceable impactors. This mid-sized concrete engraver is great for cutting designs that have fine detail. With its specially designed head it can cut into most small template openings. Precision made of billet aluminum, hardened tool steel and nickel plated steel. Compressor required to power the Barracuda (5 CFM at 90 PSI).

Model #: KC-208 $699.95

Shark™ Concrete Engraver

The largest Mochton Stylus Shark Concrete Engraver has 64 heat treated impactor teeth that strike the concrete more than 2000 times per minute. The operator controls the overall depth of cut (1/32" up to 1/4" deep) merely by moving the Shark's impactors over the surface. A convenient adjustable flow air nozzle is aimed at the teeth to gently blow cuttings away. Precision made of billet aluminum, hardened tool steel and nickel plated steel. Compressor required to power the Shark (8 CFM at 90 PSI).

Model #: KC-225 $995.95

Wasp™ Concrete Engraver

When it comes to touching up, removing bridge shadows, voids, and adding extra details to the engraved pattern, the Mini-Mochton Stylus Wasp Concrete Engraver is an extremely handy tool. The Wasp's name comes from its design and sound - it has a single reciprocating cutter, called a Stinger. Compressor required to power the Wasp (1 CFM at 90 PSI).

Model #: KC-204 $299.95

Replacement Shark and Barracuda Impactors

This 130 piece set of teeth will divide into 2 complete sets of impactors for the Shark Concrete Engraver, or 4 complete sets of impactors for the Barracuda Concrete Engraver.

Model #: KC-203 $39.95

Bulk Pack 1000 Impactors

Model #: KC-269 $229.95

Wasp Replacement Stinger

Tungsten Carbide Tip Wasp Stinger

Model #: KC-205 -(one stinger) $19.95

Wasp Stinger Value Pack (6/pack)

Model #: KC-260 - (six stingers) $99.95

SawKart

Turn Your Circular Saw Into a Concrete Engraving Workhorse

Convert your standard portable circular saw to do beautiful concrete engraving, cutting, grooving and scoring with ease and precision. Along with decorative engraving, SawKart's maximum cutting depth of 1½" makes it ideal for cutting crack-control joints, especially in tight spaces not accessible to a slab saw. Easy to maneuver.

Saw's Blade Guard Remains Operational

Just lift the wheels slightly off the slab and the blade guard flips forward to cover the blade.

Solid 6061 T-6 Billet Aluminum Chassis

Manufactured using strict quality standards in our state-of-the-art milling and turning centers right here in the USA.

Cuts Straight Lines, Arcs and Circles

Straight line cutting is a cinch. Add the optional center pivot and connecting tubes for limitless designs. Center pivot and connecting tubes on page 8.

Precision Front Guide/Pointer

Accurately follow cutting lines for exact designs. Flips up and out of the way to cut close to walls.

Quick and Easy Assembly

Simply slide your saw into the SawKart and tighten the set screws for a secure and precise fit.

3.150" Diameter Non-marking Polyurethane Wheels

The same sintered bronze bushings that have proven to be extra long lasting in the gritty concrete engraving environment. The diameter and the grip of the wheels make cutting track-free straight lines nearly effortless. See other wheel options on page 13.

45" x 8.5" Intertwining
44" x 8" Vine
40" x 6" Fleur de Lis
43.5" x 9.25" Knots
46" x 8" Wave
41" x 6" Celtic Braid
12" x 45" Phoenix
22.75" x 4" Ivy

Model #: KC-285 $399.95

Sportsman Set

Sure to please sportsmen and nature lovers alike!
25.04" x 29.28" Deer
24.08" dia. Bass
24.49" x 12.22" Gone Hunting
28" dia. Duck
7.13" x 10.01" Fly Lure
18.24" x 23.54" Marlin
19.68" x 4.42" Rifle
.97" x 1.24" Paw Print
4.21" x 4.00" Foot Print
3.95" x 5.50" Hoof Print

Model #: KC-280 $399.95

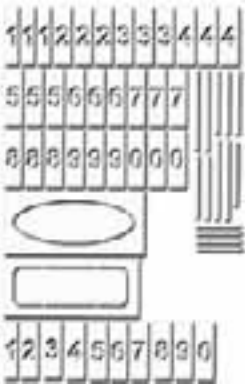
Thousands of other designs online at Engrave-A-Crete.com/designs

See our online gallery for more template choices. We have templates for just about every style and theme. www.Engrave-A-Crete.com/designs

Address Number Set

Finish the driveway with the house number. 4" tall numbers can be framed in either an oval or a chamfered corner rectangle.

Model #: KC-216 $263.95



Ashlar Slate Template Set

Create a beautiful square stone design. The ashlar slate set combines 3 different templates to create a completely unique and random looking pattern. Also included are 3 touch up templates for finishing edges and areas near walls (not pictured).

Model #: KC-211 $399.95

Flagstone Template Set

Create the rich look of random flagstone with this five piece template set. This design works great to disguise a cracked or poorly finished concrete slab. Pieces measure 23 x 23, 24 x 17, 20½ x 16, 17½ x 14¾, 21¼ x 12

Model #: KC-212 $299.95

Grout Line Template Set

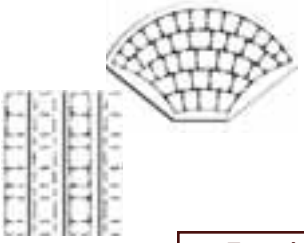
There are unlimited design possibilities with the grout line template set. Simply lay out the desired pattern using a chalk line then cut using the grout line set. Stack bond or running bond; block, brick, or stone. Even slate or random stone. An extremely versatile set.

Model #: KC-266 $299.95

Small Cobblestone Fan Template Set

Complete fan template set comes with a linear cobblestone border.

Model #: KC-214 $399.95



Large Cobblestone Fan Template Set

Now you can offer your customer the classic look of interwoven European fans. It looks very complex but is simple to use. Complete fan template set comes with a linear cobblestone border. Larger stones than KC-214 means faster cutting time.

Model #: KC-217 $399.95

Templates are available in vinyl, steel and plastic.

Upsell Your Decorative Concrete Jobs & Earn More

Are you upselling every decorative concrete job, to every customer, every single time? Sure, those simple stain jobs make you some bucks, but wouldn't life be easier if you earned more on every job rather than marketing to a new customer each time? Engrave-A-Crete templates can spell success – literally and figuratively. Use custom and standard templates to upsell your customers on these ideas. . .

A special interest symbol to personalize a home

Beautiful engraved design combination.

A stunning compass rose ups the "wow" factor.

Flagstones to disguise cracks.

A medallion for added sophistication.

For even more inspiration, check out our gallery or take a look at our Idea Book. You'll find a complete line of standard templates on our website. Or, we can create a custom template from your picture, drawing or even a simple sketch.

These job pictures were sent to us by Engrave-A-Crete installers and have been shared on our Facebook page. If you use Engrave-A-Crete tools, products or supplies and you'd like for us to feature your work, please email your pictures to debbie@engraveacrete.com.

Meet Steve! He's the expert here at Engrave-A-Crete when it comes to designing and producing those fantastic templates. He's taken some of the claims we make about our line of templates and weighed in with his thoughts—which are pretty awesome since he is the Template Master.

Available in any size

Steve says: "Absolutely true! Since we manufacture our templates and stencils when you order them, you get to tell us what you want rather than having to choose from what we have on hand."

Available in any design

Steve says: "We have several design examples in our catalog, and hundreds more on our website. We can also create your template or stencil from a picture, line drawing, logo or even just a sketch that you provide. With our advanced CAD/CAM computer programming, coupled with my magical touch, anything you want is possible. Simply give me a call and we'll get started on your design. And we won't stop until it's just the way you want it!"

Custom templates are affordable

Steve says: "Don't let the words 'custom design' discourage you because it sounds expensive. The price depends on the size, the complexity of the design, and the amount of time it requires. We will give you an accurate price quote before you place your order."

Templates are versatile

Steve says: "Our templates work equally well with the KaleidoCrete System, the Sandroid Blasting System, and Blastin' Betty."

Templates are reusable

Steve says: "Our templates are made of dense plastic. They are waterproof, UV stable and impact resistant. Once you finish a job, just wash off the template and it's ready to be used over and over."

Templates in Practically Any Size

15	$340.00	30	$610.00	45	$919.00	60	$1,189.00

CAD/CAM design time for custom templates is $60.00/hour. Preferred formats for art submission are: EPS, DXF, DWG or AI files. It is best to send a variety (if available) including JPG.

Add 50% for Sandroid version. Prices are for .2" HDPE plastic. Use the chart above to figure the estimated price of your template.

Please note: Not all designs can be made to all sizes. If your design is extremely large or small please call first. Some designs are not square, so be mindful of your design proportions. Custom work and CAD time not included in estimates

Any design can be a template or a stencil

Templates: Our templates are made of dense plastic. They are waterproof, UV stable and impact resistant. Once you finish a job, just wash off the template and it's ready to be used over and over.

Stencils: Bello Imperial Stencils are made of heavy, sticky-back vinyl. These stencils are for single use applications and can be simple or very intricate. Gelled RAC Stains and Metallic Stencil Spray work perfectly with Bello Imperial Stencils.

Sandroid™

Pulse-Bac Vacuum Head
Automatic Self-Cleaning Vacuum Control Technology separates the fine dust particles and reuses the blasting media. No more clogs!

Twist-on HEPA Rated H-13 Filters
Highly efficient, durable filters for nearly dust free blasting.

Operates at 30-50 CFM, 90 PSI
The ideal specifications to get the job done.

Heavy-duty Vacuum Hose
Allows you the flexibility to move as you work while blasting media is recirculated and dust is captured.

Uses Standard Engrave-A-Crete Templates
Choose from our standard template designs or contact us for custom designs made specifically for your job.

16 Guage Powder Coated Steel Body
Looks sharp on the job site yet is strong and durable.

HD Steel Chassis
Industrial strength for the toughest of jobs.

Machined Aluminum Nozzle
Precisely channels blast media for easy engraving. Replaceable wear points are simple to install.

The power to blast complex and delicate images into concrete but gentle enough to etch beautiful designs into glass.

The Sandroid is a highly versatile, mobile, recirculating sandblasting system capable of a range of tasks from surface cleaning and preparation to decorative applications. Sandroid creates beautiful images in decorative concrete (stained or unstained), glass, granite, marble, and many other vertical or horizontal surfaces, interior or exterior, by blasting away the top layer in a pattern defined by a template. Designs are unlimited.

The Sandroid Pulse-Bac Pack

The Sandroid with the Pulse-Bac Vacuum

When you want to use your Sandroid, simply place the Pulse-Bac vacuum head on the Sandroid Body. When finished, return the vacuum head to its body to use as a dry vacuum. The package includes the Sandroid Base, 50lbs of Blasting Media, the Flexi-Blast Template starter set and the Pluse-Bac HEPA Vacuum.

Model #: SD-200 $6,495

Sandroid Blasting Media

Premium quality blasting media designed for use in the Sandroid. This media has sharp points for best cutting speed, reusability and does not contain silica. 50 lb. bag.

Model #: SD-101 $89.95

Sandroid Nozzle

The Sandroid nozzle is the gun component where the air and blast media mix. It is a wear item that must be replaced prior to it wearing out to avoid replacing the gun. *Routinely check for wear (thin side walls).

Model #: SD-102 $39.95

Stunning, sophisticated designs are fast and easy with Sandroid.

BLAST FORCE SYSTEM

Blastin' Betty takes it off...

old carpet glue
paint marks
existing acid stains
existing pigmented stains
pigmented concrete dyes
sealers - regardless of age
epoxy coatings
overlay coatings

Just about anything stuck on concrete can be easily and quickly removed with Blastin' Betty.

ENGRAVE COMPLEX DESIGNS INTO CONCRETE FAST

WORKS GREAT FOR FLOOR PREP

ENGRAVE ANY CUSTOM LOGO OR DESIGN USING ENGRAVE-A-CRETE TEMPLATES

MADE IN THE U.S.A.

Blastin' Betty

Don't be fooled by Blastin's Betty's rich red lips, her cute little dress, or even her shotgun. She's a strong, versatile woman with important things to do. Whether used for floor prep or engraving, her powerful motor fires steel blasting media to cut the surface of concrete. Cleanly. Perfectly. Every time. Get her on your team. You'll be glad you did.

Model #: BF-101 $6,995

Watch Betty take it off at
Engrave-A-Crete.com /blast-force

Premium Blast Shot Media

Blastin' Betty Bullets! Betty fires this steel blasting media to cut the top surface of the concrete. Made of high quality recycled steel and packaged in a convenient plastic bucket. Pick up the stray media and reuse it over and over. 50 lb net weight. *Does not qualify for free shipping where applicable.*

Model #: BF-200 $69.95

Magnet

This 24" heavy duty floor magnet is used to pick up the blast shot media that escapes the recapture function of Blastin' Betty. It features a quick release handle that is operated while standing.

Model #: BF-210 $249.95

Shot Funnel

This collapsible shot funnel is constructed from heavy duty rubberized fabric. After picking up the stray blast media with your magnet, the shot funnel makes it easy to capture and replace the media into Blastin' Betty or back into your bucket. It comes complete with replaceable aluminum side support rods and carrying handles.

Model #: BF-211 $99.95

Concrete Resurrection™ Materials

Reactive Acid Chemical Stains (RAC)

RAC Stain is a single component solution of acidic metallic ion particles which, when applied to concrete, chemically reacts with the particles in the cement (free alkali) to form oxides in the pores of the concrete. These oxides become a permanent part of the substrate to create a colored, translucent, variegated and sometimes marbleized effect. The art of RAC Stain is that no two slabs will ever color exactly the same. The texture of concrete, age and dilution ratio affect final color appearance. The translucence of RAC Stain allows the many unique characteristics of the slab to show through. Every project is a unique piece of art.

Intense Reactions

FREE Technical Support

RAC Stain 16oz. Sampler Kit

You get a 12-Pack (one of each color) of 16 ounce bottles. Perfect for deciding the right color for your next job.

Model #: CR-600-12PK- $99.95

Incredible Color Selection

Highest Quality Materials

Convenient 16 oz. size for small jobs, touch up and color testing. Covers 13-63 sq. ft.

16oz. Bottle $9.95

Economical one gallon size covers 100-500 sq. ft. depending on dilution rate.

1 Gallon Bottle $49.95

Coverage will vary based on dilution ratio, application & porosity of concrete.

Stains marked with an asterisk (*) are for indoor use only.

Water Reducible Concentrate (WRC) Stain Colors

Concrete Resurrection Water Reducible Concentrate (WRC) is an environmentally friendly penetrating waterborne acrylic pigmented stain. WRC Stain is a superior alternative to hazardous solvent based stains.

WRC - Water Reducible Concentrate Stains in 8 oz. and 32 oz. bottles

32 oz. bottle **makes 1.25 to 2.25 gallons of ready to use stain** and covers 100-300 sq. ft. *$39.95*

8 oz. sample bottle **makes 40 to 72 oz. of ready to use stain** and covers 65 sq. ft *$14.95*

One 32 oz. bottle makes up to 2.25 gallons!

What Makes WRC Stain Different?

More colors - Choose from more than 30 beautiful colors - WRC Stain also allows the applicator to make custom colors by mixing different concentrate colors together.

Hyper-Concentrated - A 1 quart bottle can cover up to 300 sq ft of concrete.

UV Stable – We utilize specialty pigments that are designed to be used indoors and outdoors

No Inert Fillers -1 quart of Concrete Resurrection contains 1 quart of stain, not a bunch of unnecessary junk.

No Thickeners - Some companies thicken their pigmented stains- Not Concrete Resurrection.

Ongoing Technical Support - When you purchase Concrete Resurrection, you get FREE ongoing Technical Support

30 Pack Sampler Kit

You get a 30 -Pack (one of each color) of 8 ounce bottles. Perfect for touch-ups or deciding the right color for your next job.

CR-515 Inside Acrylic - Interior Floor Sealer

Inside Acrylic produces outstanding color richness, durability and gloss. Simply the best polymer technology available in a water based sealer. For added durability and shine, use CR-520 Inside Floor Finish as a maintenance top coat. Covers 200-400 sq. ft/gallon.

CR-515 - 1 Gal $59.95
CR-515 - 5 Gal $219.95

CR-520 Inside Floor Finish – Interior Floor Protector

Inside Floor Finish is a high gloss, long lasting and renewable maintenance coat for interior decorative concrete floors. It dries quickly and is easy to apply, making it ideal for commercial venues with high traffic and limited time for refreshing floors. (Must be applied over the top of a cured sealer.) Covers 1000 sq. ft. per gallon.

CR-520 - 1 Gal $34.95

CR-530 Inside Epoxy – Interior Floor Coating

Inside Epoxy is a two component, 100% solids resin system used as a low, medium or high build coating. Inside Epoxy provides an outstanding balance of strength, flexibility, chemical resistance and clarity. 100-300 sq. ft. per kit.

CR-530 - 3/4 Gal Kit $79.95

CR-560 Outside Acrylic – Exterior Concrete Sealer (400 voc)

High quality clear, 25% solids, solvent based acrylic designed for sealing decorative concrete projects. Outside Acrylic is a hard acrylic polymer that produces easy to clean coatings with excellent gloss and stain-resistance. Adhesion to properly prepared concrete surfaces is excellent and the material is non-yellowing. (For Exterior Use Only) Outside Acrylic is in compliance with local, state and federal Volatile Organic Compound regulations. Each 5 gallon container covers 1000-2000 sq. ft.

CR-560 - 5 Gal $229.95

Skid Reducer

Broadcast Skid Reducer additive on the surface prior to spraying on the final clear coat to give the surface "grip". Also can be broadcast into epoxy if slip resistance is required. Covers 800-1200 sq. ft.

Model #: ME-335	*Fine Skid Reducer*	*$19.95*
Model #: ME-337	*Coarse Skid Reducer*	*$19.95*
Model #: ME-353	*Aggressive Skid Reducer*	*$19.95*

CR-580 Degreaser

A multipurpose high strength industrial cleaner and degreaser. Used during the initial cleaning process to remove grease and suspend particles to ensure a clean surface. For interior and exterior use.

CR-580 - 1 Gal $29.95

CR-590 Paint & Sealer Remover

Paint and Sealer Remover is the most effective non-hazardous coatings remover on the market. CR-590 Paint and Sealer Remover is specifically designed to attack the chemical bond of the coating with the concrete. This process effectively "lifts" the coating off the surface rather than emulsifying it. Removes paint, sealers, glues and adhesives. For interior and exterior use.

CR-590 - 1 Gal $69.95

CR-765 Surface Prep & Etch

A concentrated phosphoric acid-based etching solution with specialty additives to safely prepare concrete surfaces before applying stains and sealers. Surface Prep & Etch gently removes topical laitance and creates a porous surface to increase the penetration of concrete stains and sealers. It produces minimal fumes, is biodegradable and safer for use near grass and plants.

CR-765 - 1 Gal $39.95

CR-645 RAC Stain Color Extender

When diluting RAC Stains to achieve a lighter shade of color, it is imperative to maintain the proper pH balance of the entire mix of material. With Concrete Resurrection's blend of proprietary enhancers, your RAC Stains will maintain the vivid tones even when diluting for lighter shades. RAC Stain Color Extender allows you to achieve the desired color without having the color wash out when removing the residue.

CR-645 - 1 Gal $15.95

CR-585 Surface Neutralizer

A concentrated and highly effective non-suds pH balancing solution to be used following the application of CR-765 Surface Prep & Etch and after the application of RAC Stain. CR-585 Surface Neutralizer is a blend of ammonium hydroxide (a high powered pH increaser) and proprietary neutralizing agents. It effectively increases the pH level of the concrete surface to ensure stain and sealer performance

CR-585 - 1 Gal $15.95

A versatile Epoxy System from Concrete Resurrection - One System that does it ALL! Use CR-530 Inside Epoxy as a clear sealer or add our specialty pigments for a solid or metallic color floor.

Model #: CR-400- $299.95

Metallic Pearl Additive

Add the look of rich bronze, gold, silver or copper to your floor. Great as an accent when added into cut lines or logos. Fantastic if you coat an entire floor to give the appearance of metal plating. When using a solid color floor coating, add (1) bottle of metallic pigment into one can of "Part A" inside epoxy resin. * Must be trowel or squeegee applied for best appearance. Color samples are general representations of color after applying two coats of pigmented inside epoxy. See product technical data sheet (CR-530) for additional information.

CR-420 Bronze Metallic Pearl $9.95
CR-421 Copper Metallic Pearl $9.95
CR-422 Gold Metallic Pearl $9.95
CR-423 Cream Metallic Pearl $9.95

Pigment - 4 oz Bottle

When using epoxy as a cut line back fill, add pigment to the resin to tint the color you need. Less pigment will give a translucent color; add more pigment to make the color opaque. When using epoxy as a solid color floor coating, add (1) bottle of pigment into one can of "Part A" Inside Epoxy resin. Color samples are general representations of color after applying two coats of Pigmented Inside Epoxy. See product Technical Data Sheet (CR-530) for additional information.

Unsightly and damaged concrete becomes a stainable and engraveable surface!

Transform unuseable to beautiful with Mantello

Mantello Resurfacer was used to make this basement floor look like new.

Mantello Resurfacer is a single component polymer cement coating for stable concrete surfaces that provides superior coverage to transform damaged, worn or unsightly concrete into an unblemished surface. The proprietary blend of ingredients gives Mantello Resurfacer exceptional durability and the tenacious holding power needed to eliminate delamination, peeling and flaking.

Mantello Resurfacer from Engrave-A-Crete gives you incredible features!

Resurfacer does not qualify for free shipping.

- Easy to mix and apply
- Readily accepts Concrete Resurrection RAC and WRC decorative concrete stain
- Perfect for engraving in an endless variety of patterns
- Exceptionally durable
- Bonds tight to existing stable concrete
- Environmentally progressive - no need to remove concrete
- Affordable and dependable

Mantello Resurfacer

Hard to find supplies for your floor buffing machine

Nylon Bristle Brush with Riser - Used for removing residue after RAC staining an interior floor, or for interior cleaning after engraving is finished.

Model #: ME-373 $199.95

Sanding Screen - 17" 100 grit sanding screen, 10 per box. Use on interior floors to remove the shiny hard troweled top surface to open the floor up so it will accept stain. More aggressive than a black pad and designed for use with water. These sanding screens will cut faster and last longer then conventional black (wood) sanding screens. (Use a black pad on a floor machine as a driver.).

Model #: ME-391
(Case of 10) $149.95

17" Black Pad - Best pad for scrubbing an interior floor prior to staining.

Model #: ME-374

(Case of 5) $35.95

Pad Driver - Used for gripping (attaching) pads to a floor machine.

Model #: ME-372 $199.95

17" Coatings Removal Pad - 36 Grit - This very stiff pad is impregnated with abrasive grit to cut off sealers, paints and concrete. For quickest coating removal use plenty of water and add weight to your floor machine

Model #: ME-368 (Single Pad) $79.95
Model #: ME-381 (Case of 5) $349.95

Pressure Washer Valve Kit

Change attachments without having to shut down your pressure washer. Simply shut off the water flow at the hose end.

Includes male and female quick couplers.

Model #: ME-317 $99.95

(11 AMP, 175 RPM, 110V)

A motor canopy bracket allows the operator to add up to six 9 pound weights directly above the center of the motor for increased friction without compromising balance.

- Powder coated aluminum chassis is chip-resistant and corrosion resistant.
- Star latch allows operator to adjust handle to any comfortable height, using hand or foot.
- Dual deadman switch system stops motor with release of trigger for operator protection.
- Extra heavy-duty axle and wide wheels provides easier transport.
- Continuous water feed hook-up with valve conveniently located on handle.
- Non-marring bumpers on chassis and motor canopy.

Model #: ME-371 $2,094.75

Bello Stencil Applicator

When applying a Bello Stencil to the surface, you need the right tools to smooth down the stencil and remove small air pockets. Two different sizes make the job easy.

4" Applicator
Model #: SV-204 $2.95

12" Applicator
Model #: SV-205 $7.95

Magic Trowel

Flexible blade smooths like magic! The Magic Trowel's patented blade is designed to smooth out and spread materials without leaving those annoying trowel lines. Used for epoxies and microtoppings. A real time and labor saving product.

Model #: ME-500 14" Magic Trowel $29.95
Model #: ME-501 22" Magic Trowel $32.95
Model #: ME-502 26" Magic Trowel $35.95

Moisture Meter

Used for detection of excessive amounts of moisture on concrete prior to applying stains and sealer. Simply contact the probes to the surface and read the large dual scale indicator.

Model #: ME-390 $49.00

Grinder / Dust Shroud / Diamond Blade Combo

Used for general surface grinding to remove coatings in preparation for epoxy or stain application. Attach a vacuum to collect the dust as you grind. The flip-up front allows the diamond blade to run along the wall to grind edges where larger equipment is unable to reach. The system includes a Metabo angle grinder, dust shroud with vacuum port, and turbo diamond cup blade.

5" Angle Grinder 5" Turbo Cup Blade Dust Shroud

Model #: BF-130 $499.95

7" Angle Grinder 7" Turbo Cup Blade Dust Shroud and U Handle

Model #: BF-131 $699.95

Cotton Mesh Filters

Package of 250 filters. A clog in a sprayer wastes time and is extremely frustrating. Eliminate clogs by straining all material that you put in your pump sprayer.

Model #: ME-363 10 Pack $4.95
Model #: ME-384 250 Pack $49.95

Natural Rubber Vacuum Squeegee

New vacuum squeegee nozzle attachment comes with two piece chrome steel wand, removable squeegee head and replaceable natural rubber fins that won't mark up your concrete. Separates into 3 pieces for easy storage. Fits standard 2" wet/dry vacuum hoses.

Model #: ME-365 $99.95

Replacement Rubber Fin *Model #: ME-364 $11.95*

Pressure Washing Deck

Use this washing deck to quickly clean flat surfaces evenly and easily. Clean large areas consistently and in half the time. Will not leave any pesky wand marks behind. 20" diameter with nylon brush skirt.

Model #: ME-382 $1,495

Concrete Anchoring Kit

For use with the center pivot

Model #: ME-301 $79.95

Use the Right Sprayer for Excellent Results!

Sprayer for RAC & WRC Stain

Designed for applying Concrete Resurrection RAC Stain, WRC Stain, Degreaser and Paint & Sealer Remover.

This pump sprayer has a 2 1/4 gallon capacity and comes with a fan tip as well as an adjustable conical spray tip. It can be used for the application of any acidic material. Never spray solvents with this unit.

Model #: ME-393 $99.95

ME-393 Sprayer Parts

Fan Tip *Model #:ME-539 $9.36*
Conical Tip *Model #:ME-399 $9.62*
Rebuild Kit (replacement seals) *Model #:ME-397 $17.22*
Wand *Model #:ME-413 $14.95*
Trigger *Model #:ME-415 $38.95*

Sprayer for Solvent Based Sealers

The only pump sprayer on the market designed to hold up to Xylene and Acetone. Special seals allow this sprayer to handle any harsh solvent.

2 1/4 Gallon capacity, heavy duty hose, professional trigger/wand assembly, and 2 sizes of spray tips. Designed for application of Concrete Resurrection Outside Acrylic Sealer. Never spray acidic products with this unit. Fan tip.

Model #: ME-392 $149.95

ME-392 Sprayer Parts

Fan Tip *Model #:ME-398 $9.36*
Tank Gasket *Model #:ME-412 $13.84*
Rebuild Kit (replacement seals) *Model #:ME-396 $34.12*

2 Qt Pump Sprayer

Use this sprayer for small jobs or detail work. Great for spraying Concrete Resurrection WRC & RAC stains. Conical tip.

Model #: ME-322 $39.95

Replacement Nozzle

Replacement nozzle for 2 quart pump sprayer. Conical tip.

Model #: ME-386 $12.95

S.A.L.E.S. Simulated Artistic Layout Engraving Software Version 2.0

Don't just tell your prospects what a difference decorative concrete makes. Show them!

You'll close more sales by working interactively with your customers in the on-screen design of projects. They'll be amazed as their concrete is transformed right before their eyes to look like brick, tile, stone, with or without pictorial inlays or a border. With S.A.L.E.S. it's quick and easy to seal the deal.

This unique and proprietary PC based software allows you to simulate a nearly unlimited variety of colors, patterns, textures and designs within a digital photo of any proposed concrete engraving project.

Simply take a digital photo of your client's concrete, load it onto your computer, then transform the photo to show the many options available for the project. Customers choose patterns and colors based on a visual of their own setting. This easy-to-use software comes loaded with standard patterns, colors, templates, and lots of extra tools.

Version 2.0 SALES Software *Model #: ME-455 $199.95*

Your Own Custom Brochure

A professional tri-fold brochure, mailer and home show hand-out all in one. Have a custom brochure for your company, customized with your name and contact information. Brochures are printed, folded and delivered* to your door. Three designs to choose from. Call for more details about design choices and order form.

Model #: ME-327 Price: $39.75 each (minimum order of 10)

The Engrave-A-Crete Line of Tools

Our tools are designed with a range of capabilities. Some are more suited for one application than another. That sometimes makes deciding which tool to buy a bit confusing.

We've developed this chart to simplify the issue a bit. It's meant only as a guide, and it's based on the ease of use and the effectiveness of each tool according to the application.

Of course your tool choice will depend on a number of factors, including the types of installations you want to make, whether you're adding to your business or starting a new one, and your budget.

If you have further questions about a particular tool or process, please give us a call at 800-884-2114. We're here to help you.

Frequently Asked Questions

What is the Engrave-A-Crete® System?

The Engrave-A-Crete® System consists of several combined processes that remodel concrete to produce a pleasing appearance. Briefly, a deep penetrating acrylic or chemical/acid stain is used to transform the color, then a permanent, precise, pattern is engraved (cut) INTO the hard concrete. The Engrave-A-Crete® Process is NOT a topping or overlayment that could chip off.

Where can Engrave-A-Crete® be used?

Driveways, floors, parking lots, entries, walkways, basements, pool decks, patios, restaurant and retail floors--any residential, commercial or municipal concrete. Many homes, office buildings, restaurants, stores, fast food establishments, and convenience stores have Engrave-A-Crete® inside and out.

How long does it take to do a job?

A job may take from one to several days depending on the size of the job, the weather, operator skill and pattern. Here are some averages to give you an idea of the time required for engraving.

- 16 man hours to engrave 1900 sq. ft. driveway in a linear 8" x 8" tile pattern
- Two days to engrave a 1000 sq ft. brick pattern driveway
- 1.5 to 2.5 minutes per square foot to engrave flagstone

Some of the designs in the pictures look difficult to do. Do I need construction skills or artistic talent?

It's really very simple but don't tell your customers. Customers (homeowners and businesses) think it looks difficult and artistic - that's what you get paid for. At first glance, most think the circular patterns could be difficult to learn but actually they are the easiest and most profitable to do. Almost anybody can learn to do the most complicated looking designs.

How much do the materials and supplies cost?

It's very important to keep those costs low, and that's one of the great benefits of this system. Materials and supplies, which includes concrete coloring stain or dye, clear seal coat, roller covers, concrete preparation supplies and other miscellaneous items all cost about $.25 to $.85 per square foot for exterior jobs, and $.40 to $1.35 per square foot for interior floors. Diamond blades cost about 2 to 8 cents per square foot depending on the aggregate hardness, operator techniques, and depth of cut.

Can the Engrave-A-Crete® process be done indoors?

Yes. Interior work is the main business of many operators.

How many people does it take to do the engraving?

Many times one person can do the entire process.

Frequently Asked Questions

Is the process difficult to learn?

We often use the phrase "coloring book easy" to describe the Engrave-A-Crete process. Simple tile designs and flagstone patterns are good sellers and are quite simple to lay out and engrave. Even detailed designs can be easily engraved using the KaleidoCrete tools or the Sandroid combined with templates. After a bit of experience, you'll be able to lay out complex geometric designs and engrave them with ease, and from there the sky's the limit. You'll find some training options further down in the FAQ's.

Can I stop in the middle of a job?

A major advantage of the Engrave-A-Crete® Systems - most of the time, if you find it necessary to leave a job site during operations, it's no problem. If it rains or gets too hot to work, just quit. It won't damage the finished product. Simply return when you are able and start where you left off. This is very important due to things that are beyond your control such as the weather, illness, golfing, or major sporting events! Some phases, like the application of stain or sealer should be finished, but generally it's no big deal to simply stop work.

How does weather affect the installation process?

Although it may not be practical, concrete can be engraved on the coldest or the hottest days. The concrete surface temperature needs to be between 50 and 90 degrees for the application of stains and sealers.

Is there a warranty on the engraving equipment?

Yes, Engrave-A-Crete® warranties engraver components for 1 year. Warranties cover manufacturing defects. Except for normal wear, tear, and usage, we will fix, repair or replace the equipment and /or parts as we determine. Items that we don't manufacture but resell as a convenience (such as air compressors) are covered by the manufacturer's warranty.

What is the going rate for engraved concrete? In other words, what are other people charging?

Pricing depends on your location, the pattern, the size of the job, the number of colors, and a few other factors. Generally we suggest that you charge more than products like overlayments and toppings. The perception of price and quality go hand in hand. The complete Engrave-A-Crete® process sells in a price range of $4.00 to $9.00 per square foot for an average driveway. Prices are higher ($6 to $10 per square foot) in some areas where they have good marketing and sales techniques. You should charge more for small areas like patios and sidewalks or borders.

What are the options for training?

Ideally everyone interested in decorative concrete engraving would attend our Discovery & Training Seminar. There you'll get hands on experience using our stains, sealers and equipment. You'll fast track through basic to advanced techniques and learn valuable tips and tricks of the trade. While you're here, there's no pressure to buy and no obligation to purchase. If attending a seminar isn't a possibility for you, then self-train with the aid of the Mastering Concrete Engraving DVD and machinery manuals. Also check out our You Tube training videos at youtube.com/engraveacrete. We welcome your comments, questions and ideas. We are here to help. Just give us a call at 800-884-2114.

See more FAQ's at Engrave-A-Crete.com/faq or give us a call if you have any more questions.

With Engrave-A-Crete's unique tools, processes and products, you can transform ugly surfaces into awesome works of art. These Before and After shots tell the story.

Discovery and Training Seminar

Learn the secrets to engraving designs into concrete.

From low-tech to state of the art, you'll learn how to make fast, high-quality installations on existing concrete. No tear outs, messy overlays, labor-intensive stamping or large crews needed. Engraving puts the pattern INTO the concrete, not ON it, meaning no call-backs for chipping or delamination. That's good news for you and for your customer.

You'll get hands-on experience with the complete line of Engrave-A-Crete tools in this action packed, three-day seminar. Whether you're starting a new business or adding to an existing one, decorative concrete engraving can be your next step toward a successful future.

You'll have no franchise fees to pay, no territories and no restrictions. You work where you want, when you want and the profit is all yours.

Here's what some of our previous seminar attendees have to say:

"If it were not for pioneers like yourself…those like me would be toiling our lives away in some factory… dreaming of what you have given us the tools to make a reality. Thanks to all of the Engrave-A-Crete family for helping me realize self-sufficiency. SALUTE"

- Jason Thorn, Alabama (Facebook)

"The best money I have ever spent. Everyone was very professional and friendly. I felt that I was learning from the experts, but they didn't talk down to us and were patient with questions. I also appreciated that there was no "Rah-Rah" BS and no high pressure sales. Can't say enough about the experience."

-Richard Walker, Washington

Learn from the Pros

Truly an industry pioneer, Darrel Adamson, Engrave-A-Crete CEO, patented the first concrete engraving tools more than two decades ago. Now, many tools, innovations and patents later, he and his son Brandon have condensed their vast experience and expertise as concrete artisans and successful businessmen into a seminar unequaled in the industry. You learn the best from the best!
